## Allied Army Cross Reference 6.0

Base Ally List	Year(s) Available	Book	Page	Base Army List	Book	Page
	3	The page number refers to the location of the main army list. The ally list can only be found in the Errata as it was left out of the books.				
	4	These allied troops may be purchased as allies as normal or as they can be incorporated into the main army without an allied commander, count in the normal chain of command, and the minima and maxima of both the main list and the Central American Allies list apply.				
	5	There is no actual ally list as of yet. Look for it in a future errata.				
	6	Although there is a Lombard list in <i>Decline &amp; Fall</i> on page 20, the only Lombard ally list (and it is for post Carolingian conquest) is in <i>Wolves from the Sea</i> (p. 39).				
	7	This list should have been after the Late Achaemenid Persian list but was left out of the book. It can now be found in the Errata.				
	8	These allied troops may be assumed to be a part of the main list or can be under allied commanders. If under their own commander they must conform to the Triple Alliance Allies list but the troops are deducted from the minima and maxima of the main list.
